A2L Compliance

2-1-2025

Ultravation has confirmed with UL the compliance for all in-duct air purification products with UL 60335-2-40 standard as it relates to new A2L refrigerants.

Why is UL 60335-2-40 required?

While new A2L refrigerants are mildly flammable. Under UL 60335-2-40, devices installed within HVAC air handling units must meet the electrical safety and flammability standards ensuring safe operation with A2L gas.

UL 60335-2-40 sets critical safety requirements for manufacturers of electrical heat pumps, air-conditioners, dehumidifiers etc. It focuses on the safe operation and energy efficiency of the whole HVAC system, particularly products utilizing refrigerants, making it important across the HVAC industry.

Ultravation products installed per manufacturing specification and guidelines meet and or exceed the minimum recommended safety requirements as called out under UL 60335-2-40,

All products shown on www.Ultravation.com or Solarisiaq.com meet the safety requirements of the standard.
